What problem are we solving?

01 **Public & Academic Libraries**

Have cataloguing backlogs that staff can't clear by hand.

02 **Independent & Community Libraries**

Need affordable cataloguing sized for small teams, like the worldbibliotech.net network.

03 **Digital Archive Curators**

Need consistent subject and metadata records across collections from many sources.

04 **Librarian & Cataloguer Communities**

Need a shared, open classification scheme instead of a closed, proprietary one.
